

Question	JPL Response
<p>I saw your email on Addendum 4 and got it yesterday. But I was also scanning through the material reached from the "Exhibit 2 Documents" link on the main page and in the "project documents" section, there is a new posting date of 5/22/01 for the Mission Trajectory Document. The document itself shows a revision date of 4/17/01 (we have that version and have been using it). I'm concerned that the document posted 5/22/01 is an undated revision.</p>	<p>Please refer to Exhibit II, Project Documents, Mission Trajectory Document, page vii-Documents Change History.</p>
<p>Exhibit II, Reference Document, JPL D-20391, Announcement of Opportunity, Proposal Information Package was revised on 5/4/01.</p>
