

Question	JPL Response
Paragraph 3.0, Proposal Pricing, in all cost volumes, includes a requirement to provide data on a 3.5 inch computer diskette. Since the information to be provided is a very large data file it would require splitting the file into several diskettes. That may make it more difficult for JPL to use in their evaluation. The data would fit on a CD ROM. May we use a CDs for each cost volume in lieu of several 3.5 diskettes?	Yes.
